

Pari AI - Arshad ke Business ki WhatsApp Assistant

Poora Package - Code + Setup Guide

Yeh kya hai

Pari ek AI assistant hai jo Arshad ke home-service business (AC service/repair) ke liye WhatsApp par customers se baat karti hai. Yeh:

- Har customer ke message ko samajhti hai (Hindi/Hinglish/English) - Claude AI se
 - Booking, rate inquiry, aur complaints handle karti hai
 - Har customer ka data/contact save karke rakhti hai
 - Complaint/urgent message aane par turant Arshad ko WhatsApp alert bhejti hai
 - Naye instructions yaad rakhti hai jab Arshad bataye
 - Sweet, apna-sa, care karne wala tone use karti hai
-

Zaroori Sach - Yeh 2 Cheezein Sirf Arshad Khud Kar Sakte Hain

1. **WhatsApp Business API access (Meta se, free)** -
Business ke Facebook account
se login karke developers.facebook.com par
register karna. Isme OTP verification
hota hai jo sirf account owner ke phone par aa
sakta hai.
2. **Server hosting** - Yeh code kahin 24x7 chalna
chahiye (Render.com/Railway.app
jaisi jagah). Free tiers available hain.

Koi bhi AI tool yeh 2 steps kisi ke liye nahi kar sakta -
yeh security ke liye
hai, taaki sirf business owner hi apna account control
kare.

FREE TEST MODE - Bina Verification, Bina Paise Ke Shuru Karna

1. developers.facebook.com par Facebook se login
karein
2. "Create App" → type **Business** select karein
3. App ke andar "WhatsApp" product add karein
4. Apna WhatsApp number "To" field mein daalein -
OTP se verify ho jaayega

5. Isi page par **Access Token** aur **Phone Number ID** milega
 6. 5 numbers tak free test kar sakte hain, bina business verification ke
-

FILE 1: pari_core.py (Pari ka Dimaag)

```
"""
Pari - Arshad ke business ki AI Assistant
(Core Brain)
=====
=====

Yeh file Pari ki "soch" hai. Isme:
- Har WhatsApp message ko samajhna (real AI
se, keyword se nahi)
- Customer/lead data save karna
- Owner (Arshad) ko complaint ya loss hone
par alert bhejna
- Naye instructions/rules jodna jab Arshad
bole

Isko seedha nahi chalate - isko
whatsapp_server.py import karta hai.

{self.owner_name} ke home-service business
(AC service/repair) ki WhatsApp AI
assistant.

Tumhara kaam:
1. Customers se Hindi/Hinglish/English,
jaisa bhi wo likhein, usi mein naturally
baat karo.
2. Agar customer booking/service chahta
hai: uski location aur preferred time
poocho, phir confirm karo.
3. Agar customer rate/price poochta hai:

```

general range bata do, exact service type poochkar.

4. Agar customer ki koi shikayat (complaint) hai ya gussa hai: use assure karo aur bolo ki turant {self.owner_name} sir ko batate hain.

5. Hamesha polite, warm, aur professional raho. Zyada lamba mat likho - WhatsApp jaisa short reply do.

6. Apni tone sweet aur friendly rakho - jaise koi apna, care karne wala insaan baat kar raha ho, robot jaisa nahi. Halka sa emoji use kar sakti ho (😊, 🙏) jahan sahi lage, lekin overdo mat karo.

7. Customer ko naam se bulao agar usne bataya ho, aur uski baat dhyan se suno - use lage ki Pari sach mein uski parwah karti hai, sirf reply nahi de rahi.

{self.owner_name} sir ke special instructions (yeh hamesha follow karo):
{rules_text}

Apna jawab seedha customer ko WhatsApp par bhejne jaisa likho - koi extra explanation nahi, sirf reply."""

```

FILE 3: requirements.txt

```
flask==3.0.3
requests==2.32.3
anthropic==0.39.0
```

Setup Steps (Jab Access Token aur Phone Number ID mil jaaye)

1. Ek server (Render.com/Railway.app) par yeh 3 files (upar wali) daalein
2. Install karein: `pip install -r requirements.txt`

3. Yeh environment variables set karein:

- `ANTHROPIC_API_KEY` - console.anthropic.com se milega
- `WHATSAPP_TOKEN` - Meta se mila hua token
- `WHATSAPP_PHONE_NUMBER_ID` - Meta se mila hua ID
- `WHATSAPP_VERIFY_TOKEN` - khud koi bhi secret text
- `OWNER_WHATSAPP_NUMBER` - Arshad ka number, alerts ke liye

4. Server chalayein: `python whatsapp_server.py`

5. Meta developer console mein webhook URL set karein:

`https://aapka-server.com/webhook`

Naya Instruction Pari Ko Sikhana

```
POST https://aapka-server.com/owner/add-instruction
```

```
Body: {"instruction": "Naya rule yahan likhein"}
```

Sawal Ho To

Yeh document Arshad ne Claude (Anthropic) se
banwaya hai apne business ke liye.

Kisi bhi confusion ke liye Arshad se seedha sampark
karein.
